LANGER RESEARCH ASSOCIATES
SURVEY RESEARCH DESIGN • MANAGEMENT • ANALYSIS

- ▶ ACSOR–Surveys was founded in 2003 by D3 Systems to create Afghan market and opinion research capacity: www.acsor-surveys.com
- ▶ Langer Research Associates designs, manages and analyzes high–quality probability–based public opinion surveys. The firm has extensive experience in election and public policy polling: www.langerresearch.com

Afghan Futures

- ▶ Conceived and independently conducted since 2010 by ACSOR–Surveys and D3 Systems as a public service to document public attitudes in Afghanistan.
- ▶ The project includes five nationally representative studies to date between 2010 and 2014. To see more results from the Afghan Futures series, please visit:

www.acsor-surveys.com

or

www.d3systems.com

Methodology

- F2F sample in all 34 provinces
- Area probability w/ urban/rural stratification; random walk from 540 starting points
- Within-household selection via Kish grid
- Interviews in Dari and Pashto
- Weighting to urban/rural status by province and gender by region per 2011 CSO projections
- Field work and DP by ACSOR-Surveys
- Analysis by Langer Research Associates

Methodology (cont.)

- ▶ Field work: March 10–18, 2014
- ▶ Election Day was April 5
- ▶ N=2,643, RR 81%
- ▶ MOE ± 2.5 for GP, ± 4 for LVs, inc. DEFF

Field Team

- Interviews conducted by ACSOR-trained, locally based professional interviewers
- In compliance with cultural norms, all interviews were gender-matched.

- ▶ Quality control measures included supervisor and telephone back-checks on appx. 18%, logic and patterning controls, double-entry on appx. 10%.

Inaccessibility and Replacements

- One in 10 men, 26 percent of women live in areas inaccessible due to security conditions.
- Inaccessible districts were randomly replaced within the same province.
